

Don't Get Caught with Your Hoist Down

This workshop will discuss the following items to include:

Do you have overhead cranes and hoists in your facility?

Are your operators trained?

What type of inspection program do you follow?

Have you completed the required documentation for your crane safety program?

OSHA, CMAA and ANSI/ASME B30 regulations as they apply to hoist and crane operators; pre-operational inspection requirements; and operator responsibilities.

"The right sling for the right job", proper lifting techniques, identifying unsafe situations and basic rigging safety.
